2.7. AREAS OF RESEARCH

2.7.1. SPECIAL AREA OF INTEREST: APPLICATIONS OF THE HISTORICAL THESAURUS OF ENGLISH

I am the Director and Chief Editor of the *Historical Thesaurus of English*, having previously worked on the project since 2005. My particular research focus is in the use of the complete *Thesaurus* database for long-range computational views of semantic change, the history of English and the nature of lexical meaning. I am presently working on merging these semantic insights with techniques from corpus linguistics, through the *SAMUELS* semantic tagger.

I have previously worked on phonotactic clusters in the history of English, metaphorical cross-domain mappings (leading to the *Mapping Metaphor* project), visualising semantic change, colour words in historical context, and the use of *Thesaurus* data in text-mining and discourse studies. Other studies have included more focused case study examinations of terms for *men* and *woman*, *civilization* and the *uncivilized* (with Andrew Struan), *passion*, and the concept *red*.

Consisting of over 805,000 words and 225,000 conceptual categories, the second edition of the *Thesaurus* is unique both in its coverage and in its systematicity. It is an unparalleled source of primary data on the history and semantics of English. Produced by a team at the University of Glasgow over 50 years, has been described as ‘perhaps the single most significant tool ever devised for investigating semantic, social, and intellectual history’ (Randolph Quirk). The *Thesaurus* consists of the recorded vocabulary of English virtually in its entirety from c.700 CE to the present, arranged into a comprehensive semantic framework. This framework, hierarchical in nature, therefore allows a reader to understand not only which words were available in order to discuss any particular concept in the history of English, but also the range and variety of words which were available at any given point. The framework itself also provides a comprehensive survey of all the things, concepts, and ideas which have been recorded in the last millennium of English.

2.7.2. SPECIAL AREA OF INTEREST: POLITICAL AND LEGAL DISCOURSE

I have responsibility for the *Hansard Corpus 1803–2005*, held at Glasgow and an outcome of the 2014 AHRC-funded *SAMUELS* project. The corpus is a development of an earlier version I created in 2009 as part of the JISC-funded *Parliamentary Discourse* project. I am presently working on the ways in which questions of manipulation and personal integrity (and its absence) are pragmatically realised and debated in highly formal political discourse. This corpus, one of the largest corpora of English available and the only one which gives such a

detailed a diachronic perspective on politics and political language in Britain, is currently under active development, and is intended to form part of a new platform for political and legal discourse which would incorporate other related datasets for parallel studies in the history of political and legal thought in the English-speaking world.

In addition, I was co-director of the project *The Language and the Sentiments of their Times*, with Andrew Struan, which examines the linguistic and historical context of primary historical sources. Our pilot study on terms for uncivilized persons used in the British Empire was published in 2013, and we were funded by the HEA to complete pedagogical materials resulting from this project. Arising from this, we presently have a book manuscript in preparation on the construal of the Other in the UK Parliament.

2.7.3. SPECIAL AREA OF INTEREST: DIGITAL HUMANITIES, BIG DATA, AND COGNITIVE LINGUISTICS

I direct the STELLA Digital Humanities Lab at Glasgow, which moved to new premises in 2012. It is the UK's only dedicated computer laboratory for teaching English studies, and has been a key site of pioneering work in computer-assisted learning and experimental digital research on large-scale collections of language and literature over the past 28 years. My own research uses computers and digital humanities techniques to analyse linguistic meaning and theoretical linguistics, and this is reflected in my convenership of the long-established *Literary and Linguistic Computing* honours paper, taught since 1990.

Beyond this, my previous work on popular science has combined digital-empirical and cognitive approaches to the nature of construal within science texts, and in so doing computationally demonstrated both the existence of the reification strategy in that genre, and analysed the cognitive nature of the linguistic construal of complex ideationally-driven discourse. I continue to combine a cognitive-linguistic approach to meaning with empirical results from computational analysis, and am currently working on a monograph which describes this from the standpoint of the digital humanities.

I generally program in Python using the NLTK, but have also worked with R, Racket/Lisp-Scheme and Processing. I also use L^AT_EX for document processing. My teaching uses these open-source packages for linguistic analysis as well as more straightforward corpus linguistic tools.

3.2.2. POSTGRADUATE

2017–2018	Lecturer, PGT <i>Semantics</i> , half-semester
2015–2016	Guest Lecturer, School of Critical Studies Research Training Course
2014–2015	Lecturer and Convener, School of Critical Studies Research Training Course
2013–2014	Lecturer and Convener, School of Critical Studies Research Training Course
2012–2013	Lecturer and Convener, School of Critical Studies Research Training Course

- 2011–2012 Lecturer and Convener, College of Social Sciences Research Training Course, half-year
- 2010–2011 Lecturer and Convener, College of Social Sciences Research Training Course
- 2009–2011 Lecturer and Convener, ‘Ph.D. User’s Guide’, College of Arts
- 2009–2010 Guest Lecturer, International Research Communication Summer School, IRUN Network
Lecturer ‘Speed Ph.D.’, College of Social Sciences
- 2007–2009 Lecturer and Convener, ‘Ph.D. Survival Guide’, Faculty of Arts
Lecturer and Convener, Faculty of Education Research Training Course
- 2007–2012 Convener, Cognitive Linguistics Reading Group (formerly Cognitive Semantics Reading Group)

All courses except the 2010 ‘Speed Ph.D.’ both designed and implemented de novo; ‘Speed Ph.D.’ was convened by Dickon Copsey and based on materials from Manchester University. The International Research Communication Summer School was convened by Elizabeth Adams. The ‘Ph.D. Survival Guide’ was jointly taught by myself and Johanna Green, and the ‘Ph.D. User’s Guide’ between myself, Johanna Green, and Andrew Struan.

3.3. INVITED TEACHING

- 2017/8 *Big data and statistical methods*, University of Heidelberg, Germany, late 2017/early 2018
I have been invited to conduct a graduate workshop at Heidelberg on research in English which uses big data of a type which requires statistical analysis techniques.
- 2015 *Tools of the Trade*, Pre-Conference Workshop, International Society of Anglo-Saxonists, University of Glasgow, August
I ran an invited session at this workshop on lexical research for medievalists.
- 2015 *Data Visualization for the Arts and Humanities*, Digital Arts and Humanities, Queen’s University Belfast, March
Funded by a research consortium comprised of five academic partners (Maynooth University, National University of Ireland Galway, the Royal Irish Academy, Trinity College Dublin, University College Cork) and hosted by the Institute for Collaborative Research in the Humanities at Queen’s University Belfast, this two-day event for PhD researchers in Ireland focused on data visualization. I was one of two plenary speakers amongst the workshops.
- 2013 *Early Modern Digital Agendas*, Folger Shakespeare Institute, Washington DC, July
Funded by the National Endowment for the Humanities under their Institutes for Advanced Topics in the Digital Humanities programme, I delivered two days of teaching and two days of discussion/contribution to this three-week digital humanities institute, focusing on semantics in the digital humanities and visualization techniques in corpus linguistics.
- 2011 Radboud University, Nijmegen, the Netherlands, May
Funded by the IRUN Network, one repeat lecture to first-year undergraduates on the evolution of meaning in English based on the *Historical Thesaurus* and two new lectures, one on Old English morphology and the other on the evolution of colour terms in the history of English.
- 2010 Edinburgh Napier University, Edinburgh, July
A two-hour lecture and activities for the remainder of the day for approx. 20 international students at the joint Edinburgh Napier/Moscow State University summer school. This was on the use of corpus linguistics for the investigation of English and Scots, and ways in which language learners can use this work to improve their knowledge of idiomatic English, including an introduction to the varieties of English in Scotland. The summer school’s director of studies invited me based on my research post with the JISC Enroller project.

- 2010 Radboud University, Nijmegen, the Netherlands, May
Funded by the IRUN Network, invited lecture to first-year undergraduates on the evolution of meaning in English based on the *Historical Thesaurus*. Also supplied tutorial materials and tutor notes. I was invited by the course convener after she attended a 2009 conference paper, and was asked to deliver a lecture as part of their work in integrating new research into their first-year curriculum. I also gave an additional research talk about my work to staff from Radboud and the nearby Max Planck Institute.

3.4. CURRICULAR INNOVATION

- 2016–2017 Designed the Language of Laws Honours course.
- 2015–2016 Designed History of English and Corpus Linguistics Honours courses. Co-created Semantics and Pragmatics and Current Issues in Semantics Honours courses.
- 2014–2015 Launched an iPhone app with the textbook for the Structure of Modern English component of 1A English Language, alongside interactive touchscreen exercises. An Android version is forthcoming. This was developed with Brian Aitken, DHRO for Critical Studies. It has received strong praise from students in the feedback process.
- 2013–2014 Created *English Words: History, Structure, and Meaning* for 2A English Language (10-week course; a new course on English lexicology and the analysis of words in English). Consistently the highest-rated course component of 2A in student feedback from 2013 onwards.
- 2013–2014 Introduced summative peer assessment in the School of Critical Studies Research Training Course, on the basis that as postgraduates students should become accustomed to peer criticism and the delivery of accurate and constructive feedback. This used the Aropä system. Students gave very positive feedback on this, with particular reference to its usefulness to career development.
- 2012–2013 Created *Semantics and the Law* course component of *Semantics of English*.
- 2012–2013 Revised Honours *Literary and Linguistic Computing* (year-long course; added a focus on corpus stylistics and digital humanities research methods).
- 2012–2013 Created School of Critical Studies Research Training Course (year-long PGT course).

3.5. SUPERVISION OF STUDENT RESEARCH

- M.A. Lauren Hewings, Kezia Rudge, Gillian Furnage, Nicola Saxton (2012–13), Hannah Birtwistle-Craigne, Suzi Blake, Amy Dodson, Zoe Jacobs, Lewis Thomson, David Smith, Kirsteen Smith, Michael Watling, Louise Wilson (2013–14), Rebecca Bradley, Emmie Harrison, Clare McVay, Robin Sapkota, Peter Stewart (2014–15), Kieran Banister, Calum Liddle, Ketu Marga, Christopher Miller, Nathan Speirs, Hannah Westwater (2015–16), Gemma Bryant, Julia Boardman, Lauren Hughes, Aileen McEwan, Dora Pongracz, Sarah Ralph, Helen Stewart (2016–17)
- M.SC. Alicia Copeland* (2015–16)
- M.PHIL. Jennifer Dornan* (2012–13), Ross McLachlan* (2013–14), Kieran Wilson (2016–17), Niamh Thomson (2019–20)
- PH.D. Agnieszka Marszalek (2012–16), Jennifer Dornan* (2013–16), Elina Koristashevskaya* (2013–18, part-time), Ross McLachlan* (2014–17), Lorna MacBean (2014–17), Iiris Karoliina Ollikainen* (2015–19), Alicia Copeland* (2016–21, part-time), Daniel Szpotanski* (2016–20), Rachel Fletcher (2017–21), Amber Hinde* (2019–2022)
