Change in Meaning

Marc Alexander · Week 10

1400s: *That peaceful serving boy made a fool out of their silly young goat's strength.*

The merry knight was fond of their nice kid's craft.

Modern: *The cheerful warrior liked their pleasant child's skill.*

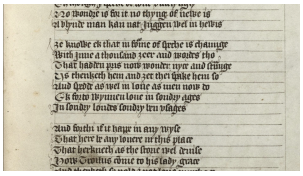

FIGURE 1 A page of a fifteenth-century manuscript of Troilus and Criseyde, written in a black textura hand

FIGURE 2 The four lines of the manuscript transcribed below, in a black textura hand

Ye knowe ek, that in forme of speche is chaunge
With inne a thousand yeer and wordes tho
That hadden prys, now wonder nyce and straunge
Us thinketh hem and yet thei spake hem so

[You know also that forms of speech will change
Within a thousand years, and words
That had a value, now wondrous silly and strange
We think them, they yet they spoke them so]

Chaucer, Geoffrey. c.1385. *Troilus and Criseyde*. Book II, lines 22-25. Manuscript c. 1415-25: Cambridge, Corpus Christi College, MS 061, f. 149r

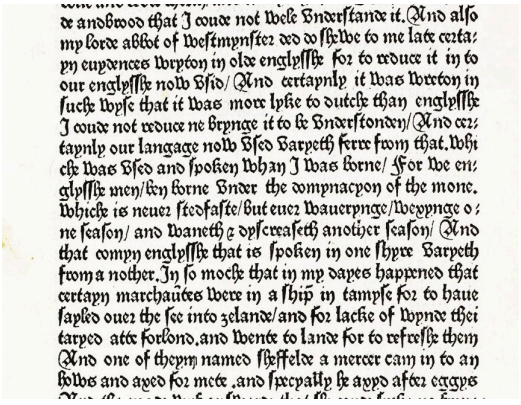

FIGURE 3 A page of Caxton's printed Eneydos, 1490, in black letter type

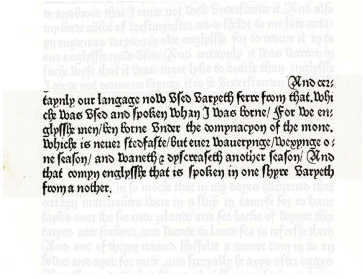

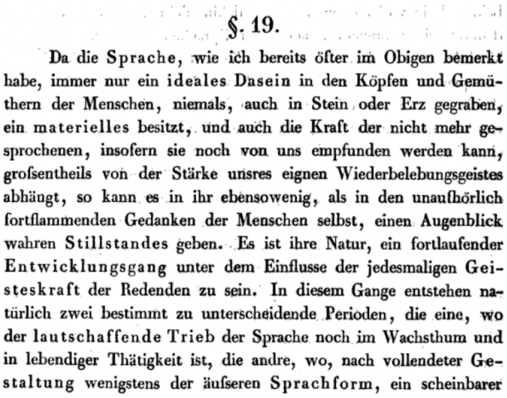

FIGURE 4 The same page of the Eneydos, veiled except for the passage beginning 'And certaynly our langage now vsed'

And certaynly our langage now vsed varyeth ferre from that. whiche was vsed and spoken whan I was borne / For we englysshe men / ben [are] borne vnder the domynacyon of the mone. whiche is neuer stedfaste / but euer wauerynge / wexynge one season / and waneth & dyscreaseth another season / And that comyn englisshe that is spoken in one shyre varyeth from a nother.

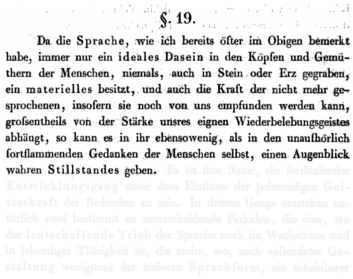

Prologue. Caxton, William. 1490. *Virgil's Booke of Eneydos*. London: Printed by William Caxton.

§. 19.

Da die Sprache, wie ich bereits öfter im Obigen bemerkt habe, immer nur ein ideales Dasein in den Köpfen und Gemüthern der Menschen, niemals, auch in Stein oder Erz gegraben, ein materielles besitzt, und auch die Kraft der nicht mehr gesprochenen, insofern sie noch von uns empfunden werden kann, grofsentheils von der Stärke unsres eignen Wiederbelebungsgeistes abhängt, so kann es in ihr ebensowenig, als in den unaufhörlich fortflammenden Gedanken der Menschen selbst, einen Augenblick wahren Stillstandes geben. Es ist ihre Natur, ein fortlaufender Entwicklungsgang unter dem Einflusse der jedesmaligen Geisteskraft der Redenden zu sein. In diesem Gange entstehen natürlich zwei bestimmt zu unterscheidende Perioden, die eine, wo der lautschaffende Trieb der Sprache noch im Wachsthum und in lebendiger Thätigkeit ist, die andre, wo, nach vollendeter Gestaltung wenigstens der äufseren Sprachform, ein scheinbarer

§. 19.

Da die Sprache, wie ich bereits öfter im Obigen bemerkt habe, immer nur ein ideales Dasein in den Köpfen und Gemüthern der Menschen, niemals, auch in Stein oder Erz gegraben, ein materielles besitzt, und auch die Kraft der nicht mehr gesprochenen, insofern sie noch von uns empfunden werden kann, grofsentheils von der Stärke unsres eignen Wiederbelebungsgeistes abhängt, so kann es in ihr ebensowenig, als in den unaufhörlich fortflammenden Gedanken der Menschen selbst, einen Augenblick wahren Stillstandes geben.

FIGURE 6 The same page of Humboldt, veiled except for the first paragraph of section 19, from 'Da die Sprache' to 'Stillstandes geben'

Since language, as I have often noted above, always has only an ideal existence in the heads and minds of men, never a material one, even if engraved in stone or ore, and since the power of language that is no longer spoken, insofar as it can still be felt by us, depends largely on the strength of our own spirit of revival, there can be no moment of true standstill in it any more than in the ceaselessly flaming thoughts of men themselves.

von Humboldt, Wilhelm. 1836. *Über die Verschiedenheit des menschlichen Sprachbaues und ihren Einfluss auf die geistige Entwickelung des Menschengeschlechts* (=On the Diversity of Human Language Construction and Its Influence on the Mental Development of the Human Species). Berlin: F. Dümmler.

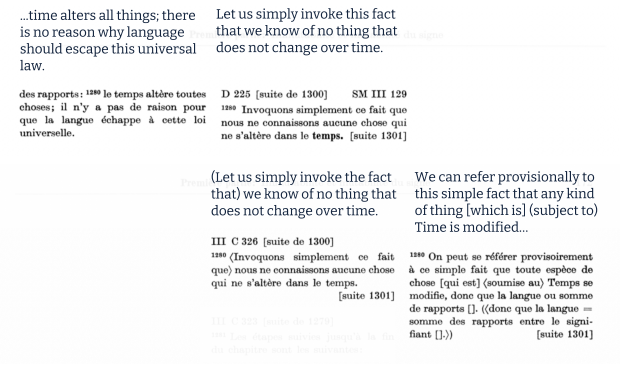

FIGURE 7 The same strips with English translations above four passages. Printed text, 'des rapports: le temps altère toutes choses; il n'y a pas de raison pour que la langue échappe à cette loi universelle': ...time alters all things; there is no reason why language should escape this universal law. D 225, 'Invoquons simplement ce fait que nous ne connaissons aucune chose qui ne s'altère dans le temps': Let us simply invoke this fact that we know of no thing that does not change over time. III C 326, '(Invoquons simplement ce fait que) nous ne connaissons aucune chose qui ne s'altère dans le temps': (Let us simply invoke the fact that) we know of no thing that does not change over time. 'On peut se référer provisoirement à ce simple fait que toute espèce de chose [qui est] (soumise au) Temps se modifie': We can refer provisionally to this simple fact that any kind of thing [which is] (subject to) Time is modified…

1. Semantic Change

- **Saussure:** "[…] time alters all things; there is no reason why language should escape this universal law."
- **Sapir:** "Language moves down time in a current of its own making."
- So words naturally change their meaning; language is not a fossil
- How do words change meaning?

***1400s:** The cold peasant was satisfied because her uneducated godparent looked truly skilful.*

The cool villain was sad because her lewd gossip appeared very artificial.

***Modern:** The admirable scoundrel was sorrowful because her sexually-explicit rumours seemed intensely fake.*

2. Semantic Changes

> Semantic changes are notoriously difficult to classify or systematize […] Additionally, semantic change is much more closely connected with change in the external, non-linguistic world, especially with developments in the spheres of culture and technology.
>
> Durkin, Philip. 2009. *The Oxford Guide to Etymology*. Oxford: Oxford University Press. 222–3.

FIGURE 8 The sentence 'The cool villain was sad because her lewd gossip appeared very artificial.' with four words labelled: cool: cold → admirable, becoming positive, metaphorical; villain: peasant → scoundrel, becoming negative, more precise; sad: satisfied → sorrowful, becoming negative; lewd: uneducated → sexually-explicit, becoming negative

FIGURE 9 The sentence 'The cool villain was sad because her lewd gossip appeared very artificial.' with three words labelled: gossip: godparent → rumours, becoming negative, more general; very: truly → intensely, becoming grammatical; artificial: skilful → fake, becoming negative

3. Types of Semantic Change

- Becoming positive (*cool*)
- Becoming negative (*sad*)
- Becoming more general (*gossip*)
- Becoming more precise (*villain*)
- Becoming grammatical (*very*)
- Metaphor and metonymy (*cool*)

4. Amelioration and Pejoration

- **Amelioration** (or elevation): more positive
  - *nice* (foolish → pleasant)
  - *sophisticated* (artificial → refined)
  - *knight* (servant → nobleman)
- **Pejoration** (or deterioration): more negative
  - *silly* (blessed → foolish)
  - *vulgar* (common → crude)
  - *wench* (child → servant)

5. Case Study: *silly*

Old English	*Middle English*	*Early Modern English*	*Modern English*
happy			
fortunate			
blessed	→ pious, holy		
	innocent, harmless		
	weak, pitiable	→ simple, ignorant	
		feeble-minded	→ foolish, stupid

6. Broadening and Narrowing

- **Broadening** (or widening): more general
  - *dog* (specific breed → any canine)
  - *salary* (salt payment → any payment)
  - *bird* (small birds → all avian species)
- **Narrowing** (or specialization): more precise
  - *meat* (any food → animal flesh)
  - *deer* (any animal → specific species)
  - *starve* (any death → death by hunger)

7. Grammaticalization

- Grammaticalization: becoming grammatical
- More precisely: content word → function word
  - *have to* lexical possession → modal obligation
  - *while* noun meaning 'time' → subordinating conjunction
  - *like* adjective meaning 'similar' → discourse marker, quotative
  - *because* PP 'by cause' → subordinating conjunction
  - *away* OE 'on weg', PP 'on one's way' → adverb

8. Metaphor and Metonymy

- Next week! Change through similarity and association:
  - *sweet* (taste → personality)
  - *sharp* (edge → intelligence)
  - *bitter* (taste → emotion)
  - *suits* (clothing → businesspeople)
  - *press* (machine → media)
- Can happen with whole domains:
  - In psychology, many physical metaphors (*depression, projection, defense, pressure, breakthrough, burnout, perspective, falling apart*)

9. Chains

- Like with *silly*, these changes are often chained in complex ways:
  - *navigate* (sail a vessel → move between physical obstacles → move between figurative obstacles → use a website)
  - *awful* (inspiring awe → worthy of respect → impressive → frighteningly impressive → dreadful, monstrous → very bad)
  - *bully* (sweetheart → fine fellow → protector, champion → swaggering person → intimidator → harasser)
  - *heart* (organ → emotional centre → to love/like → like/favourite symbol → digital interaction)

10. Why do meanings change?

- *External forces* such as new things in the world shift word meanings (so *wireless* meaning 📻 *radio*, common in the early and mid twentieth century, now often means technology without cords, as in ⌨ *wireless keyboard*)
- *Internal forces* such as metaphor, or systemic regulation (OE/ON 👗 *skirt*/👚 *shirt*; homonymic clash in Northern English and Scots  *neer/kidney*, 👂 *ear/lug*)

11. Evidence

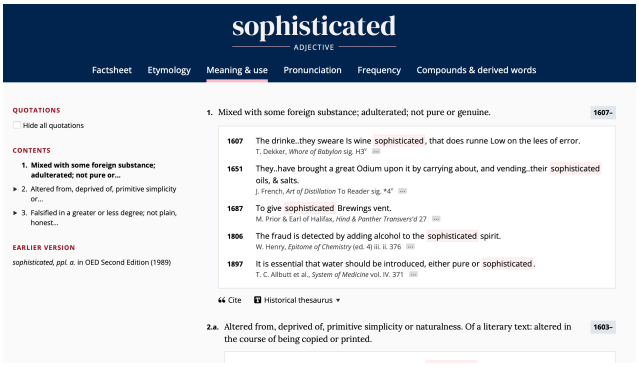

FIGURE 10 The OED Online entry for sophisticated, adjective, open at Meaning and use, with the first sense 'Mixed with some foreign substance; adulterated, not pure or genuine' and its quotations from 1607

- You should use OED citations to see examples in use (remember meanings exist only in use). So:
- *naughty*, adjective
  - Having or possessing nothing; poor, needy (c.1450 'More nedyer and nau3tier')
  - Having no morals; morally bad or wicked (from C15th; 1677 'A most vile, flagitious man, a sorry and naughty Governour as could be')
  - Sexually provocative (from C16th; 1675 'the naughty Town Women, who only hate their Husbands, and love every Man else')
  - Mischevious or disobedient (from C17th; 1889 'behaves like a very naughty child')

12. Words and meanings

- There are approximately 3.4 *forms* for each *concept*, on average, over the last millennium of English (804,830 words and 235,249 meanings).
- We know this due to the *Historical Thesaurus of English* (ht.ac.uk), a research project at Glasgow since 1965, which arranges all the word forms in English according to their meaning.
- It is 'a magnificent achievement of quite extraordinary value. It is perhaps the single most significant tool ever devised for investigating semantic, social, and intellectual history' (Lord Randolph Quirk).

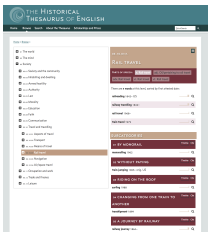

FIGURE 11 The Historical Thesaurus of English website, browsing the category 03.10.04 n. Rail travel: the hierarchy of Society and Travel and travelling on the left, the words for rail travel and its subcategories on the right

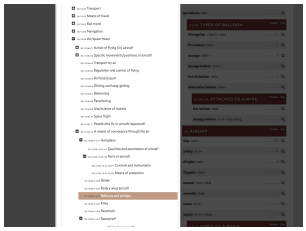

FIGURE 12 Further down the same Historical Thesaurus page: the Air/space travel part of the hierarchy, with Balloons and airships highlighted, beside the words for types of balloon, a balloon attached to a wire, and airship

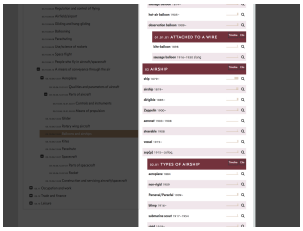

FIGURE 13 Further down again: the words for an airship, from ship (1679) and airship (1819) to Zeppelin and zep(p), and the subcategory types of airship, with blimp

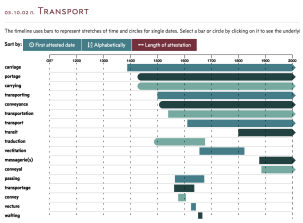

FIGURE 14 The Historical Thesaurus timeline for 03.10.02 n. Transport: one bar per word, from carriage, portage and carrying to vecture and wafting, showing when each was in use

FIGURE 15 www.ht.ac.uk

13. Recent Language Change

- Punctuation becoming lexical items:
- 'Don't *at* me.'
  - I've spent countless dollars on cushions and pillows that didn't quite meet the approval of my neurotic hound mix, Leona, ending up shredded to pieces or, at best, ignored. Having a big pooch also means their furniture is going to be big, so you might as well pick an option or three (yes, Leona has three, don't at me) you don't hate looking at[…]
    Architectural Digest, 'The Best Dog Beds for Your Furry Best Friend', January 2024
- 'He's her boyfriend *slash* therapist'
  - One use: the first part intended versus the second part actual.
  - Another use: hesitation or blending. 'It's a library slash cafe', 'It's strawberry slash tangerine or something?'

14. Follow-up

- As well as general reading from the reading list, you should have a look at chapters 4 and 5 from:
  - Kay, Christian & Kathryn Allan. 2015. *English Historical Semantics*. Edinburgh: Edinburgh University Press. (As always, available as an ebook via the library.)
- If you have questions, talk to your tutor or do please come see me (email me for a time!)

Notes

1. de Saussure, Ferdinand. 1916. *Cours de linguistique générale*. Eds. Charles Bally & Albert Sechehaye, with Albert Riedlinger. Paris: Payot. de Saussure, Ferdinand. 1968–1974. *Cours de linguistique générale, édition critique.* Ed. Rudolf Engler. Wiesbaden: Harrassowitz.
