An invented or fake entry in a reference work (esp. a dictionary or an encyclopedia), a database, etc., typically used by the publisher to identify plagiarism that constitutes an infringement of copyright.
2005–
2005 An independent investigator set himself the task of sifting through NOAD's [= New Oxford American Dictionary] thirty-one hundred and twenty-eight 'e' entries in search of the phony... Six potential Mountweazels emerged.
New Yorker 29 August 32/2
2009 Such an intentional mistake—known as a Mountweazel or Nihilartikel—effectively poisons the database to unlicensed users, because its presence proves that the data was copied rather than created from scratch.
