Corporate specimen

Every corporate construction, in the 2026 template

A plain bulleted slide

- The text box default: 28 pt, Arial bullets on a hanging indent, 12 pt after each item
- A second point, long enough to wrap onto a second line so the hanging indent can be judged at a glance
  - A second level at 24 pt
- A third point

The template’s content placeholder

- This slide uses the master’s body: 32 pt, 90% spacing
  - Level two, 28 pt, with an em dash
    - Level three, 24 pt
- A deck can make this its default in the corporate settings

A lead, cards and a takeaway

Every course assesses its intended learning outcomes, and the grade states how well they were attained. A paragraph above cards is the lead, at 20 pt.

Glasgow Grading Scheme 1

Primary grades A to H, with secondary bands from A1 (22 grade points) to G2 (1) and H (0).

Judgement is made by direct reference to the primary verbal descriptors.

Glasgow Grading Scheme 2

Single grades A0 to H, each carrying a single grade point value for aggregation (A0 is 22, D0 is 11).

A light card

University Blue text on the light colours, as the brand requires.

The course specification is the authoritative source for the components of assessment and their weights (§16.2(b)).

Consecutive notes are paragraphs of one panel.

Cards that take the deck’s colours

1

What does a grade mean?

2

When has a student done enough?

3

What do we owe a student when life gets in the way?

4

What does a second chance do?

5

What does the degree outcome mean?

A bare `::` takes the next colour of “cardColours”

Subtitles, a wide card and a build

Configuration

Before marking starts

The convener and Assessment Officer confirm that the gradebook matches the course specification.

Exceptions

At course validation

Reviewers check every administrative grade and every fail.

The wide card arrives on a click (builds appear instantly in corporate decks).

Part 1

What does a grade mean?

Assessment Regulations §16.22 to §16.31

A worked example beside a card

The course grade is the weighted average of the component grade points.

A student on a History of Examples course: examination 60% at B2 (16 grade points), essay 40% at C1 (14 grade points)

16 × 0.6 = 9.6

14 × 0.4 = 5.6

9.6 + 5.6 = 15.2, rounded to 15: B3

Rounding

Courses using Scheme 1 for 50% or more of the assessment: round half up to a whole number. The rounded value is final.

Assessment worth 10% or less of a course affected by approved extenuating circumstances may be excluded from the course grade.

AR §16.29 to §16.31

A flow of three cards

The claim

Ross misses his examination through illness and submits a claim within five working days.

Stage 1: Student and Academic Services

Is the claim supported? How severe were the circumstances, and for how long?

Stage 2: the School

What happens to each affected component of assessment.

Schools see the Stage 1 determination, not the evidence.

A stack

The *Assessment Regulations* govern assessment on every taught programme.

Assessment Regulations
Grading, credit, GPAs, reassessment, extenuating circumstances, classification

Degree Regulations: UG, UG-Clin, PGT, PGR
What a degree is made of and how students move through it

Programme specifications
The detail for each programme, approved by a Board of Studies

AR §16.1 to §16.5

Statistics

96%

Fewer files

109 files → 4 files

89%

Reduction in text

185,320 words → about 19,800 words

A table

Code	Meaning	Effect	When
NS	Not submitted	Scores zero	Any assessment
EC	Extenuating circumstances	Session pending	Deferred assessment
CNY	Credit not yet awarded	Session pending	Additional requirement

Honours entry

Year 1 → Year 2 → Junior Honours → Senior Honours → Award

The normal route

A GPA of at least 12.0 at the first attempt across the level 2 courses in the intended Honours subject.

If the gate is missed

The Head of School or nominee can admit a student whose performance suggests they can succeed.

UG §9; AR §16.13(d)

The SIW

Year 1 → Year 2 → Junior Honours → **Senior Honours** → Award

The requirement

A level 4 or 5 course of at least 20 credits, with a course code ending in P.

When it goes wrong

It is never covered by compensatory credit.

Grade strips

A3
B2
C1
D3

A student with these grades across 120 credits has a GPA of 15.3 and passes every course.

C2
C2
C3
C3
D3
D3

An orange strip with white grades (converted decks: the old light-yellow strips).

Bars and a ribbon heading

Old

- Two documents, one for each level
- Exceptions held locally

New

- One set of regulations
- Exceptions in the course specification

Headers over text and a rule

The problems

- Inconsistent degree calculation spreadsheets
- No institutional training on the Code of Assessment

The instructions

- Regulation simplification
- New Award of Credit rules

The core direction

- A shift to greater standardisation

The University has submitted and agreed a public Action Plan with QAA.

A band above the cards

The question award of credit answers

“Should this course count towards the student’s degree?” This is separate from the grade itself.

Course-level credit

Credit for a course when the student achieves D3 or above.

Session-level credit

D3 or above in two-thirds or more of a session’s courses gives credit for every course in the session.

Icons on discs

UG

Replaces 34 individual regulation files.

UG-Clin

Replaces 6 regulation files.

PGT

Replaces 43 regulation files.

PGR

Replaces 26 regulation files.
